

Sandvik QJ341+ is a new addition to our bestselling QJ341 jaw crusher range. This model will come with the added benefit of a double deck pre-screen as standard. This will enable the removal of a large amount of fines to increase your throughput resulting in greater efficiency, higher productivity and less wear on the crusher. This will be particularly effective in quarrying applications where you have a high proportion of fines in the feed material.

Alongside the pre-screen we have incorporated a telescopic natural fines conveyor with a discharge height of 3.1 m / 10 ft 3" for greater stockpiling capabilities and a three position by-pass chute to increase flexibility in material distribution. These are in addition to a new design of self-locking hopper which is safe and easy to set-up from ground level. Sandvik QJ341+ will come with the same user-friendly features as the standard model, such as hydraulic adjustment, reversible jaw and hydraulic drive to enable the crusher to start under load, minimizing downtime.
