

Screen Rebuild Program

Extending the life of your screen

Want lower costs per ton?

Ensure availability, reliability, and optimum performance

Process optimization is a key concern from all users. Let Schenck Process help you get the highest reliability from your screens. Schenck Process offers customizable solutions for your used screens. From complete rebuilds and upgrades to simple component replacements, we can tailor a solution for your needs. For over 70 years, mining companies have trusted Schenck Process as their screening equipment partner.

We can take your used screen, clean, test, and evaluate every component, and recommend the best course of action for quickly and cost-effectively returning it to "as new" condition.

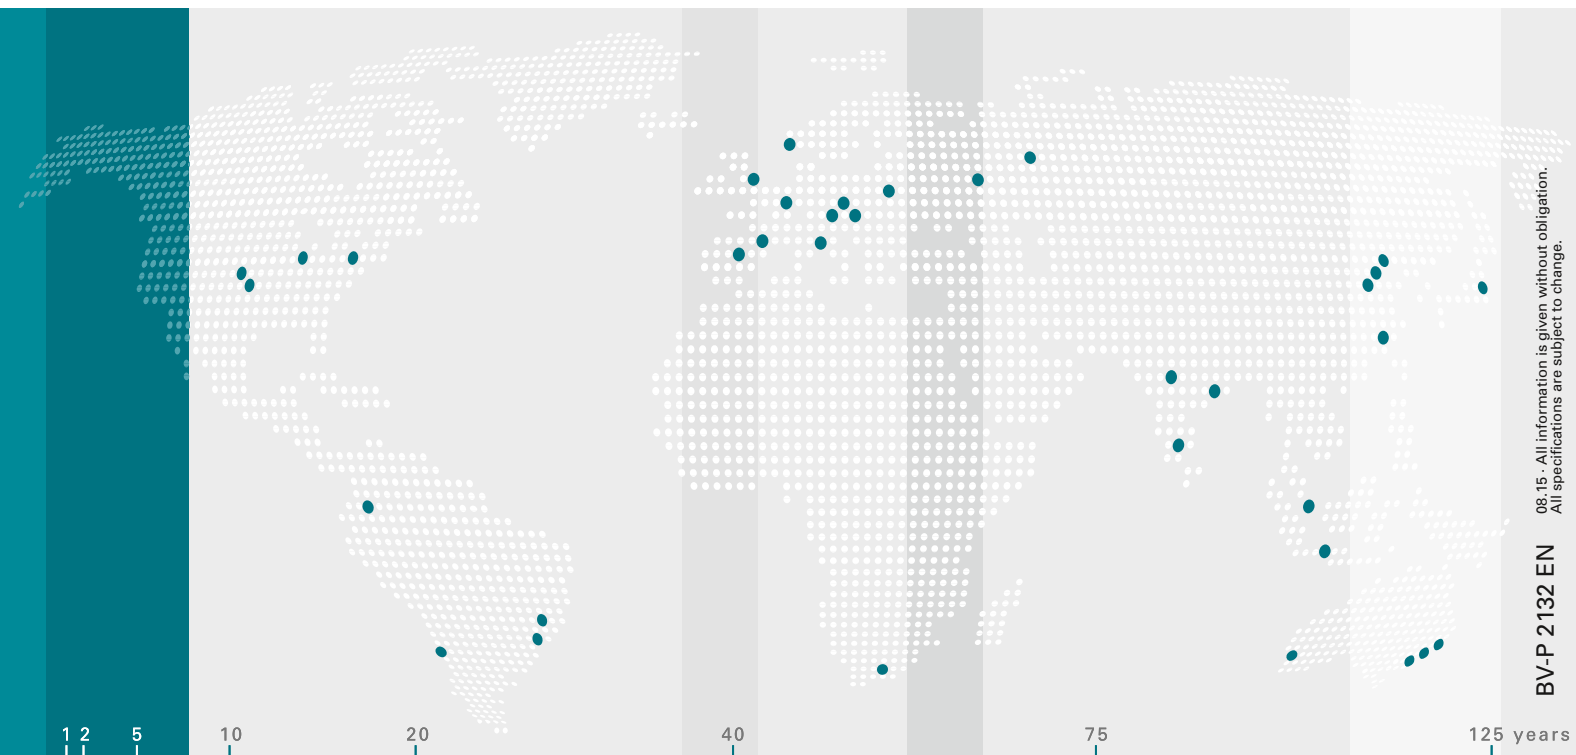

Schenck Process screen rebuilding process

- quote customer for disassembly of screen ⇒
- disassemble screen ⇒
- 3rd party vendor performs NDT (non-destructive testing) for unbiased opinion of which components have failed and need replacing in full ⇒
- report condition of all components ⇒
